Abstract	AB	[DE] Die Erfindung betrifft ein medizintechnisches Gerät, welches auf Rädern (2a, 2b, 3a, 3b) verfahrbar ist, wobei an wenigstens einem der Räder (2a, 2b) eine elektromechanische Feststellbremse (38, 51, 61) angeordnet ist. Des weiteren betrifft die

		<p>Erfindung die Verwendung einer derartigen elektromechanischen Feststellbremse (38, 51, 61) für ein medizintechnisches Gerät.</p> <p>[EN] Medical device can be moved around on wheels (2a, 3a) with at least one of the wheels (2a) having an electromagnetic locking or parking brake. The device has a battery or accumulator and can be controlled using a computer input device such as trackball, mouse, joystick or even using voice recognition. The device is used to carry other medical equipment such as an X-ray C-frame (10). The invention also relates to corresponding use of the brake for use with a mobile frame used in moving around or positioning of medical apparatus or equipment.</p>
